Michael Diego

Senior Software Engineer
Paris, Île-de-France, France

Summary

I'm a Senior Software Engineer with 10+ years of experience building
modern, scalable web applications. I specialize in JavaScript,
React, and full-stack development, with a strong focus on clean,
maintainable code and user-centered design.

My work spans startups, product companies, and freelance
consulting, where I've led frontend architecture, contributed to
backend systems, and delivered features end-to-end. I thrive in
collaborative environments and enjoy turning complex problems into
simple, elegant solutions.

I'm passionate about building software that makes a difference —
whether it's improving user experience, optimizing performance, or
launching something new from scratch.

Experience

HUB Analytics
Senior Software Engineer
March 2024 - June 2025 (1 year 4 months)
San Antonio, Texas, United States

- Resolved database synchronization issues across remote and local
environments.
- Took on full-stack development responsibilities using React, Node.js, and
SQL.
- Led frontend modernization efforts, implementing reusable UI components.
- Collaborated with product teams to design and deploy user-focused features.

The Luupe
Lead Software Engineer
June 2021 - January 2023 (1 year 8 months)
New York, United States

- Led the rebuild of the marketing site using React, Next.js, and TypeScript.
- Built full-stack features with GraphQL, Apollo, Prisma, and Node.js.

- Introduced reusable component libraries and improved frontend maintainability.
- Mentored junior developers and maintained high code quality standards.

Mahisoft Inc
Senior Software Engineer
March 2020 - May 2021 (1 year 3 months)
San Clemente, California, United States

- Led frontend development for Ten-X using React and React Query.
- Created reusable design patterns and micro frontends.
- Worked closely with backend teams on service integration and performance.
- Enhanced user workflows through interactive UI components.

Mylk Guys
Senior Software Engineer
November 2018 - December 2019 (1 year 2 months)
San Francisco, California, United States

- Migrated the site to Next.js with server-side rendering to improve performance.
- Refactored UI components for accessibility and mobile responsiveness.
- Collaborated with product and marketing teams on user-facing features.
- Improved UX through cleaner navigation and interactive design.

Mahisoft Inc
Senior Software Engineer
May 2018 - November 2018 (7 months)
San Clemente, California, United States

- Built a loan calculator to deliver accurate mortgage estimates.
- Developed frontend interfaces with React and custom financial logic.
- Streamlined the application flow to improve user experience.

WannaGo, LLC.
Senior Software Engineer
June 2017 - April 2018 (11 months)
Los Angeles, California, United States

- Developed restaurant discovery features using React, Next.js, and GraphQL.
- Implemented server-side rendering to optimize SEO and load speed.
- Collaborated on UX design and frontend architecture.
- Helped scale the product pre-acquisition by Theragun.

Citrusbyte
Software Engineer
November 2015 - May 2017 (1 year 7 months)
Los Angeles, California, United States

- Built web interfaces for IoT projects with AT&T and Apple.

- Developed responsive dashboards and marketing pages.

- Supported frontend enhancements for connected device platforms.

Moove-it
Software Engineer
January 2015 - December 2015 (1 year)
Austin, Texas, United States

- Built frontend features for educational software using AngularJS.

- Focused on responsive UI development and clean component structure.

- Worked on product improvements with cross-functional teams.

Oktana Corporation
Software Engineer
January 2014 - January 2015 (1 year 1 month)
New York, New York, United States

- Developed frontend components with Durandal and KnockoutJS.

- Integrated Node.js and MongoDB for backend features.

- Contributed to multiple client projects with scalable solutions.

Tata Consultancy Services
Software Engineer
February 2013 - January 2014 (1 year)
Montevideo, Uruguay

- Built internal tools using AngularJS and JavaScript.

- Created responsive layouts and frontend components.

- Gained foundational experience in full-cycle web development.

Education

Universidad ORT Uruguay
IT Analyst, Computer Software Engineering · (2012 - 2015)
